## **Home Fire Escape Plan**

Using the grid below, draw a floor plan of your home, including doors and windows and indicate with arrows routes of escape from every room, especially bedrooms. Always plan for two ways out, like a door or a window. Mark your family meeting place, located safely away from your home. Designate someone to assist small children, elderly or disabled. Post the escape plan on each level of your home and in locations where overnight guests and others can easily see it. Most importantly, PRACTICE. PRACTICE, PRACTICE (at least twice a year).

Remember, **GET LOW & GO UNDER SMOKE** and when you **GET OUT – STAY OUT!** 

## **EXAMPLE**

Install smoke alarms on every storey of your home, ensuring one is installed outside sleeping areas. Test the smoke alarms monthly and replace the batteries twice a year when you change your clocks for Daylight Savings Time. Clean your smoke alarms with the brush attachment of your vacuum twice a year. Replace any smoke alarms more than 10 vears old.
